Work experience:

Software Engineer OCT-2023 – PRESENT

[Informatik Lab](#)

● **PayToMe**:- It's a seamless, customizable, and secure payment experience through a quick and reliable process (Fintech Service). It features various API integrations, pixel-perfect UI/UX implementation, and uses PLAID and Stripe for payment gateway and security purposes. The technology stack includes the latest NestJS, MUI Material, HTML, SCSS, React Redux, and TanStack Query. An advanced feature of this application is a customizable invoice with various types of flexibility.

Software Engineer MAR-2022 – JULY-2023

[Groots Inc Ltd](#)

● **Otsuki Dental**:- Various API Integrations, pixel-perfect UI/UX implementation, MongoDB Queries, collecting and implementing business requirements. Technology used React, MUI Material, HTML, SCSS, React Redux. Advanced feature of this application was custom booking management and calendar.

● **Tokyo App (CMS)**:- Authentication implemented, Many business APIs integrations React Js framework. Technology used React, push notification and firebase with html, css, scss, css3 animation.

Front end Developer JULY-2020 – JAN-2022

[Anysense Co Jp](#)

● **Lens(E-commerce)**:- I developed this application from scratch, implemented validation in both front-end and backend and used Nuxt js, javascript and for state management by using Vuex.

● **Shareel**:- I developed this application from scratch with an admin panel. I have implemented advanced features on this application like chat communication(socket.io), image cropping, Apex Chart, and booking time management, social app login and register. Technology used Nuxt, Vuex, Javascript, HTML, CSS, SCSS, custom library, Apex Charts etc.

- **E-resident**:- Implemented users panel and admin panel UX/UI design and integrated backend APIs. Its main feature is that search results are obtained by using surveys. For this application, using React js, Axios, Scss
- **Honnetenshoku**:- Implemented UX/UI design and integrated various types of APIs, optimized applications. Technology used React, Javascript, Html, Css, Scss and React Redux

Web Designer MAY-2018 – APR-2020

[Webcode Limited](#)

- I have designed a few projects for the themeforest marketplace. Products are mainly created by using html, css, scss, jquery, javascript and css3 animation.
